PROFESSIONAL SUMMARY

Frontend Developer with 6+ years building high-performance, reactive web apps with Angular (Signals, RxJS), React, and TypeScript. Focused on clean architecture, rendering performance, and UIs that hold up under real traffic. Uses modern AI tooling (Claude Code, GitHub Copilot) to move faster without trading off quality, and has built full products with it end to end – a Gemini-powered mobile app and a full-stack budget tracker.

TECHNICAL SKILLS

Frameworks & Libraries	Angular (Signals, RxJS), React, React Native, Vue.js
Languages	TypeScript, JavaScript (ES6+), HTML5, CSS3
Backend & Data	Node.js (NestJS, Express), PostgreSQL, MongoDB, RESTful APIs
AI Tools & Cloud	AI-assisted development (Claude Code, GitHub Copilot), Gemini API, Google Cloud Platform (GCP)
Practices	Reactive state management, performance optimization, responsive design, code review, Agile / Scrum

PROFESSIONAL EXPERIENCE

Frontend Developer Baba Entertainment	2024 – Present
- Architected reactive, high-performance features for a high-traffic social-casino platform, significantly reducing unnecessary re-renders by migrating to Angular Signals, OnPush change detection, and RxJS-driven state. - Owned business-critical UI and core user-facing features of a live production application, delivering reliably under tight sprint deadlines. - Used AI-assisted coding tools (GitHub Copilot, Claude Code) in daily development to accelerate feature delivery and reduce repetitive boilerplate. - Built end-to-end mobile responsiveness and a reusable frontend styling system, delivering consistent high-fidelity UX across all device breakpoints on a live, high-traffic production platform.	
Frontend Developer Neotech Development	2022 – 2023
- Built responsive, user-facing interfaces for web and mobile gaming services using Angular and Vue.js, integrating RESTful APIs across 20+ features. - Collaborated in an Agile / Scrum team and conducted regular design and code reviews.	
Frontend Developer IBA Group	2020 – 2022
- Developed and maintained UIs for an IBM enterprise product, ensuring reliable functionality and a polished user experience. - Partnered with UX/UI designers and backend engineers to architect client/server APIs and translate designs into production interfaces.	
Frontend Developer Vysnova Publishing House	2018 – 2020
Delivered cross-platform solutions with React, React Native, and TypeScript; maintained Node.js / Express / MongoDB backends and integrated Google Cloud Services.	

PROJECTS

Budget Tracker — Full-Stack Personal Finance App Angular · NestJS · GCP	Personal Project
- Designed and built a full-stack budget-tracking app end to end — Angular frontend, NestJS backend, deployed on Google Cloud Platform. - Delivered the entire codebase through an AI-driven workflow with Claude Code, applying agentic, spec-driven development to plan the architecture, generate features, and iteratively refactor.	
Hebrew Vocabulary App — AI-Powered Dictionary React Native · NestJS · Gemini API · Firebase	Personal Project
- Built a cross-platform mobile Hebrew-dictionary app end to end — React Native client, NestJS backend, deployed on Google Cloud Platform / Firebase. - Integrated the Google Gemini API to dynamically generate vocabulary content, including definitions and usage examples.	

EDUCATION

B.A., Web Design & Computer Graphics — Belarusian State University, Minsk	2017
JavaScript Development Courses — IT Academy, Minsk	2020
